

**simply a sonnett about a swallow to save at least 4 twins  
(with thanks to all capabled people)**

„In case of black and in case of white  
in case of deaf and in case of blind  
in case of day and in case of night  
we archived the colours as dark and as bright  
we never demanded that much as credit  
and we never damaged that much for legends  
in cases of archived and in cases of bombs  
there are no reasons for and not for treasons as plombs  
in case of sealed and in cases of (no sorrow)  
we never forget how and whom (to follow)  
this is the resonance of sound whomever  
it may not to be a wound  
this is the reason for what we declared  
already as treasure not to be bleached  
or blasted or blaired ?!  
Therefore it is normal one day to get grey  
or white or pale or whatever shine  
this is the reason not to feel ashamed  
and this is the reason why even a bird  
would love to chirp with last odem on starving bed  
„I love you all my bugs world-wide-without-end-in-eternity“  
in case this bird really would die  
and this bird is simply a bird of the time  
and simply nothing about crime  
so simply that you can keep the cuckoo of time for you  
behind the black forest about noises of frou-frou  
  
and this uncle saved the life of a bird to throw  
out of the window and to follow on  
in freedom for new direction  
to be blowed with the wind

( + unknown jester for pacifism  
wants to stay unknown dedicated to freedom of poetry  
and for best archives in Linux already before ancient time  
of Egypt interdatas with behind Persia around far far long  
time ago before dawn + so you slept about capitalism at least  
2.500.000 light years + we never paid this so this is guarantee  
for Linux and GPL 1.0 and GPL 2.0 + in case of GPL 4.0 then this  
text absolutely MUST NOT be modified for currencies reason + translated  
into any languages as dictionaries and as libraries are free to Linux only + )
